

I listen to AIR1 radio through an FM translator. The Christian hit music encourages me. If AIR1 was replaced by a Low Power FM service (LPFM) that provided other programming, I would be sad. The local community benefits by the uplifting positive message in these Christian songs. I believe that the service provided by AIR1 is in the public interest. It changes lives for the good. It deters crime and lawlessness. It gives hope to an amoral society. Please don't displace Air1's network of translator service locations with LPFM stations. Thanks for your consideration.
